### MATRIMONIAL.

To THE LADIES OF THE UNITED STATES: It has been my good fortune to return to health many thousands of my country-women.

My success has excited the malice of the enviers and jealous, but their persecutions have not failed to extend and widen upon my organization. A number of attacks have fallen upon my railway, from the far off sources whom I have relieved. So long as I am held in accusations and think of remembrance by those who have experienced my skill, I can afford to resign the efforts of mischievous and unkind.

My friends have repeatedly urged me to make my medicine for public distribution within the reach of the Ladies of the United States, but an impulsion to enter a field occupied by others, with their penurious nostrums and a few thousand counterfeits might pain upon the public's overwrought mind. I have, however, prevented us from establishing agencies for the sale of my "AMIE DE FEMME," in the United States.

After due regard to the interests of patients and friends, and to the suffering Females of America a medicine which has rendered me somewhat famous throughout the Old World.

In regard to the efficacy of the "AMIE DE FEMME," I need only say, that it is in liquid form, and is exactly such as I used in my practice in France, for many years, and that it has been a great success.

The "Amie de Femmes" and measurement stand is therefore of value and effect. It is like powerful to originate a healthy menstrual life where it never has existed; and to renew it when it has been from cause suspended.

In order to assist and encourage the Females of America in each of the "Amie de Femmes" will bear my written signature, and both the bottle and enclosing box will be sealed with my private seal.

\$1.00 a package.

Or, Thirty Years Study and Experience,

EVENINGLY DEVOTED TO DISEASES OF WOMEN;

By Cornelius L. Cheseaux, M. D.,

ALSO, MUCH PHYSIOLOGICAL INSTRUCTION, WHICH WILL OBTAIN THE NECESSITY OF GREAT AMOUNT OF DISEASE, AND ENABLE THE OBSCURE READER TO BE, TO A GREAT EXTENT, HIS OWN PHYSICIAN.

TENTH EDITION.

This book is most valuable to the understanding of the non-professional reader, and is skillfully elaborated, and well illustrated, and carried over into the tenth edition, and will now before the public.

While it gives wholesome particulars, and in some respects have information upon some of the more delicate matters connected with the female system, it should be used in the hands of every female, single or married.

PIPER & SONS.

This work also was presented by the doctor in practice for the past two years, and is skillfully elaborated, and carried over into the tenth edition, and will now before the public.

While it gives wholesome particulars, and in some respects have information upon some of the more delicate matters connected with the female system. We clip the following notice from the Cincinnati Enquirer:

This troupe, under the management of Ramsey & Newcomb—unquestionably one of the best, if not the best, ever organized in the country—will open its season at first concert at Smith & Nixon's Hall, Thursday evening last. The audience was splendid, both in quality and quantity, numbering over sixteen hundred persons.

They had another large crowd, although the day and evening were the most moist of a very moist season. Monday evening they will re-commence at Smith & Nixon's Hall, on which occasion they will present a program of the best of the age.

—Young men will sing "My Pretty Jane," and "Gone 'round the Horn." Newcomb in his "Essence of Old Virginia," which alone is worth the price of admission. Leslie in two new ballads. Carroll, Ritter and Hedden in new dances; Rumsey vocalizes also; and the New Orleans Picayune says this same indefatigable minstrel will be the backbone of any company to which he may be attached.

Keep the Ball Moving.

MESSES. Europe.—In your paper of the 22d inst. a description was given of the Gymnasium at Dayton, O., to which some truthful remarks were added showing clearly the need of such an institution in this city. The matter should be agitated among us. Strangers often remark with surprise the absence of any school or system of physical training with us, and with pride refer to the Gymnasium, which their own cities and towns boast of. Why should Dayton have a first class Gymnasium and we not at all?

Have our young men less need of physical training, or is it because they will not give an enterprise of this character sufficient encouragement? We fancy neither is the case; there are scores of business men in our city who would not only subscribe liberally, but encourage in every possible way the formation of a first class Gymnasium here which should be conducted in a proper manner. The need of one is great, its beneficial effects are apparent to every one, and the cause should be before the public until some one is induced to take the lead in the matter. A competent man with energy, who would do so would find it remunerative. Who is the one?
